Installation and activation

Welcome to WaveLab!

Congratulations and thank you for purchasing Steinberg's WaveLab Pro!

Installing your software

Access your installation media, launch the setup file and follow the instructions to install the application on your system.

Your software Activation Code

Where to find the Activation Code for your WaveLab license depends on how you obtained your WaveLab version:

You obtained a download product from the Steinberg Online Shop

We have sent you a confirmation e-mail along with the software Activation Code for your purchased product to your registered e-mail address.

You obtained a boxed product

Your Activation Code is printed on the "Essential Product License Information" card, which is contained in the box of your WaveLab version.

Activating your license

After installation of the software, open the eLicenser Control Center application that is installed with your product, and follow the instructions to activate your license.

Get more detailed information on license activation from our website:
www.steinberg.net/activate

Registering your software

Please register your product. Once you have done so, you are entitled to many benefits such as full support and product updates.

For more detailed information on the registration process please visit:
www.steinberg.net/register

Technical support and additional resources

Technical support

Find product updates, user forums and Knowledge Base articles that help you get the most out of your products at:

www.steinberg.net/support

Maintenance updates

Developing software is an ongoing process that perpetually gets closer to perfection without ever achieving it, thus we encourage you to make sure you are using the latest version of WaveLab at all times.

Download your installation or update utility from our support website at:

www.steinberg.net/en/support/downloads

Hardware drivers

WaveLab requires recent drivers and components for your audio and remote controller hardware, so please make sure that the latest versions are installed before you start working with WaveLab.

Download the latest drivers for all Steinberg hardware from our download website at:

www.steinberg.net/en/support/downloads

Third-party plug-in support

WaveLab supports 64-bit versions of VST 2 and VST 3 plug-in effects.

Please make sure to have most recent versions of third-party plug-ins installed. If in doubt, please contact the respective manufacturer.

32-bit versions of plug-in effects are not supported.
