1 About this Document

Welcome to the KONTAKT 5 Manual Addendum! With the KONTAKT 5.6 release, new features and changed functionality will be covered in the main KONTAKT manual. All content from older versions of this manual addendum, documenting features introduced by previous versions of KONTAKT, has been integrated into the KONTAKT manual.

The purpose of this document is to list what is new with the latest update. For more detailed information on the features listed below, please refer to the KONTAKT manual and the KSP Reference.

2 New Features in KONTAKT 5.6

- Redesigned interface with a new look and feel.
- The Main Control Panel has been streamlined: all view buttons are now contained in a single Workspace menu.
- Updated Browser Pane: the Modules tab has been removed and the Monitor tab is now called the Expert tab.
- Updated Database for better integration with the KOMLETE PLAYER and MASCHINE browsers.
- Host Automation can now be assigned/removed while in Stand-alone mode.
- New KSP features, including the introduction of real numbers.
- Usage Data Tracking. The option to enable/disable data tracking is located in the Options dialog. Please refer to the Options dialog chapter of the main Application Reference for more detailed information on Data Tracking.
- An updated manual, integrating all changes since the initial KONTAKT 5 release.
